PROFESSIONAL SUMMARY

- MSc candidate in Civil and Architectural Engineering at City University of Hong Kong, with a strong background in architecture, sustainability, and smart city applications.
- Experienced in BIM, digital twins, and reality capture workflows, including Revit, ContextCapture, and ModelFun.
- Skilled in Python-based data analysis, AI-assisted design, and end-to-end architectural visualization for award-winning projects.

EDUCATION

City University of Hong Kong Sep 2025 - Oct 2026 [anticipated]

- MSc in Civil and Architectural Engineering (Built Environment & Sustainable Development)
- Thesis: Cluster Analysis of Regional Vitality Based on Multi-dimensional Characteristics: The Case of Hong Kong

Tianjin University - Academic Exchange Programme Aug 2021 - Jun 2023

- Exchange Program in Architecture | GPA: 3.72/4.0
- Awards: First Prize, 2022 National College Student Innovation Ability Competition; First Prize & Outstanding Youth, 2022 International "Belt and Road" Volunteer Initiative

Hainan University Sep 2020 - Jun 2025

- BEng in Architecture | GPA: 3.82/4.0 | Rank: 1/58; Graduation Design: Community Hospital Design for Aging Population
- Awards: 2025 Hainan University Role Model of the Year; 2025 Outstanding Graduation Design; 2024 Top Comprehensive Scholarship (Top 1%); 2021 Academic Excellence Scholarship (Top 1%); Third Prize, 2020 "FLTRP · ETIC Cup" National English Reading Competition

INTERNSHIP EXPERIENCE

Baolue Technology – Smart Building (BIM) Division | Intern Jul - Aug 2025

- Supported the Rui'an Ancient City Smart Building Management Platform by integrating BIM and IoT data into a real-time 3D visualization workflow using Revit and 3ds Max.
- Produced Lumion renderings and walkthroughs for project reporting, and supported energy-consumption analysis for green building assessment.

Baolue Technology – Digital Twin Division | Intern Jun - Jul 2025

- Contributed to the Ningbo Haishu District oblique 3D data project, including aerial triangulation, control point marking, and reality model reconstruction in ContextCapture, which received the Bronze Award of the Zhejiang Provincial Excellent Surveying and Mapping Geographic Information Engineering Award.
- Led OSGB/OBJ model repair and multi-source data integration in ModelFun, delivering a centimeter-level 3D base base for district-level digital twin applications.

Huahui Engineering Design Group – Architecture Department | Intern Jul - Nov 2024

- Participated in municipal building design from schematic development to construction detailing, rendering, and BIM modeling.
- Contributed to the Jinghu New District Public Toilet and Sanitation Worker Office Building projects using Sketch using SketchUp, AutoCAD, and Revit.

Zhejiang University Architectural Design & Research Institute – ACRC |Intern Jul - Sep 2023

- Supported cultural architecture projects, including Lu You's Hometown, through site research, cultural analysis, concept development, and schematic design assistance.
- Built architectural massing models in SketchUp and produced key visualizations using Enscape and V-Ray to communicate design intent in presentations and reviews.
- Assisted in preparing proposal documents by integrating drawings, visual materials, and written content in InDesign and Photoshop to ensure clear and professional project deliverables.

SKILLS

Digital Design & Modeling: Core Tools: Rhino, SketchUp, Revit, AutoCAD, Grasshopper
Visualization & Rendering: Rendering Engines: V-Ray, Lumion, Enscape, 3ds Max
Reality Capture & Surveying: 3D Reconstruction: ContextCapture, ModelFun ; Model Management: OSGB/OBJ repair & multi-source data integration
Design Expression & Publishing: Creative Suite: Adobe Photoshop, InDesign
Smart Building & City Tech: BIM & Digital Twin: Full workflow (Revit), IoT data integration, model lightweighting; Platform Development: Platform interface basics
AI & Creative Skills: Generative AI: Midjourney, Stable Diffusion for concept generation; Traditional: Hand sketching, architectural photography

ADDITIONAL EXPERIENCE

- Dule Temple Surveying Project; "New Engineering" Construction Project;
- Haikou Urban Physical Examination Research;
- Tianjin University Outstanding Volunteer Award.
